

Waterproof 10" In-Ground Subwoofer

Description

The 10" Ultra-Long Throw in Ground Subwoofer 300W with IP54 Protection is engineered to deliver powerful, deep bass for your outdoor audio setup. With its 300W RMS power handling, this subwoofer ensures a thrilling low-frequency experience. It features an IP54 rating, making it resistant to dust and water, allowing for reliable performance in various weather conditions.

The subwoofer's ultra-long throw design guarantees exceptional bass response, providing a truly immersive audio experience. Its robust construction ensures durability, while the weather-resistant finish protects it from outdoor elements. With a frequency response of 40Hz to 500Hz and a sensitivity of 86dB, this subwoofer delivers outstanding sound quality.

Installation is a breeze with its easy in-ground setup. Upgrade your outdoor sound system with the 10" Ultra-Long Throw in Ground Subwoofer 300W, and enjoy superior bass performance and long-lasting reliability.
